

Statement Regarding Letter to Sagepoint from The Office of Healthcare Quality:

“We strongly disagree with the findings contained in the letter, and we will be disputing them directly to the Office of Health Care Quality (OHCQ), which is how this oversight process is supposed to work. We feel it would be inappropriate and highly irregular to respond to last night’s letter in the media before we have followed the proper process, as mandated by Center for Medicare and Medicaid Services and OHCQ. It should be noted that OHCQ has informed Sagepoint that all of the concerns found during their inspections have been successfully resolved.”
