

**July 13, 2020**

**Skilled Nursing Facility Update Only:**

We are still awaiting all of the results from the universal testing of all residents in the skilled nursing facility performed on July 2. However some results have returned, and we have one resident testing positive. The Maryland Department of Health is reviewing the case to determine if this is a positive test result or dead viral RNA. We will perform another round of universal testing tomorrow. All staff were tested today, as well.
